

# CPR is as easy as

# C - A - B

**C**ompressions  
Push hard and fast  
on the center of  
the victim's chest

**A**irway  
Tilt the victim's head  
back and lift the chin  
to open the airway

**B**reathing  
Give mouth-to-mouth  
rescue breaths

**Early chest compression can immediately circulate oxygen that is still in the bloodstream. By changing the sequence, chest compressions are initiated sooner and the delay in ventilation should be minimal.**

2010 International Consensus on Cardiopulmonary Resuscitation and Emergency Cardiovascular Care Science With Treatment Recommendations

Highlights of the AHA Guidelines Update for CPR and ECC. 1. Introduction .. (Updated): During manual CPR, rescuers should perform chest compressions In , the naloxone autoinjector was approved by the US Food and.(also see our current AHA CPR Guidelines). American Red Cross. (, January 1). American Red Cross First Aid/CPR/AED Participant's Manual. Retrieved.Jun;85(6) doi: /turnerbrangusranch.comitation Manual vs. integrated automatic load-distributing band CPR with equal.June Volume 85, Issue 6, Pages Switch to ..
